

9 February 2020

Change to Class Rule 15(k)

2020 ILCA Laser Standard Men's World Championship

Class rule 15(k) is amended for the duration of this event to read:

“Padding used in the gap between the rudder blade and rudder head may be added only as applied by the event charter provider in consultation with the event technical committee.”

Competitors that require padding in the gap between the rudder blade and the rudder head should see the charter provider for assistance.
